

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claim 1. (original): A method operating on a digital computer system, comprising:

displaying a reference document containing a quotation of a passage from a source document to permit the selection of the quotation by a user; and then

retrieving the source document containing the passage quoted in the quotation selected by the user; and then

locating the quoted passage in the source document; and then

displaying the source document, highlighting the quoted passage,

where the highlighting of the quoted passage is based on the result of the locating step and not highlighting previously in the source document.

Claim 2. (original): A digital computer system programmed to perform the method of claim 1.

Claim 3. (original): A computer-readable medium storing a computer program implementing the method of claim 1.

Claim 4. (original): A method as in claim 1, where the locating step utilizes an approximate matching technique to locate the quoted passage.

Claim 5. (original): A digital computer system programmed to perform the method of claim 4.

Claim 6. (original): A computer-readable medium storing a computer program implementing the method of claim 4.

Claim 7. (original): A method operating on a digital computer system, comprising:

displaying a reference document containing a quotation of a passage from a source document to permit the selection of the quotation by a user; and then

retrieving the source document containing the passage quoted in the quotation selected by the user; and then

locating the quoted passage in the source document; and then

displaying the source document, highlighting the quoted passage and indicating any differences between the quotation and the quoted passage,

where the highlighting of the quoted passage is based on the result of the locating step and not highlighting previously in the source document.

Claim 8. (original): A digital computer system programmed to perform the method of claim 7.

Claim 9. (original): A computer-readable medium storing a computer program implementing the method of claim 7.

Claim 10. (original): A method as in claim 7, where the locating step utilizes an approximate matching technique to locate the quoted passage.

Claim 11. (original): A digital computer system programmed to perform the method of claim 10.

Claim 12. (original): A computer-readable medium storing a computer program implementing the method of claim 10.

Claim 13. (original): A method operating on a digital computer system, comprising:

displaying a reference document containing a quotation of a passage from a source document to permit the selection of the quotation by a user; and then

retrieving the source document containing the passage quoted in the quotation selected by the user; and then

locating the quoted passage in the source document; and then

displaying the source document, highlighting the quoted passage and indicating any differences between the quotation and the quoted passage by using one highlighting mode to highlight portions of the quoted passage that are contained in the selected

quotation, and using another highlighting mode to display portions of the quotation that are not in the quoted passage,

where the highlighting is based on the result of the locating step and not highlighting previously in the source document.

Claim 14. (original): A digital computer system programmed to perform the method of claim 13.

Claim 15. (original): A computer-readable medium storing a computer program implementing the method of claim 13.

Claim 16. (original): A method as in claim 13, where the locating step utilizes an approximate matching technique to locate the quoted passage.

Claim 17. (original): A digital computer system programmed to perform the method of claim 16.

Claim 18. (original): A computer-readable medium storing a computer program implementing the method of claim 17.

Claim 19. (previously presented): The method of claim 1, wherein said quotation has been copied from said source document, or another document that itself quoted said source document, when said reference document was created.

Claim 20. (previously presented): The method of claim 19 where said copying was performed as said reference document was being written by retyping said quoted passage into said reference document or by selecting said quoted passage from said source document and then inserting said selected passage into said reference document using a word processor.
